

At a Glance

HMS Group is the leading pump and compressor manufacturer and provider of flow control solutions and related services to the oil and gas, nuclear and thermal power generation and water utility sectors in Russia and the CIS.

Our team is a leading industrial group with a strong research and design base, which can offer full integrated solutions from design and manufacturing to engineering, construction works, repairs and maintenance.

We develop advanced flow-control technology and bring it to our customers, focusing on our core values:

- Long-term partnership with clients and suppliers;
- Constant development and growth to keep leadership in strategic markets;
- Ongoing improvement and perfection of produced equipment and offered solutions;
- Strict compliance with an ethic code in respect to all stakeholders;
- Lowering the environmental impact;

We do this through four divisions, which employ around 17,400 people employed in Russia, Ukraine, Belorussia and overseas.

INDUSTRIAL PUMPS

	ACTIVITIES	CORE PRODUCTS AND SERVICES
	Design, manufacture, install and service industrial pumps for	<ul style="list-style-type: none">▪ Water injection▪ Trunk pipelines▪ Oil refineries▪ Nuclear and Thermal power,▪ Water utilities▪ General industrial pumps
REVENUE	EBITDA MARGIN	EMPLOYEES
17,145066	25.0%	8,422

Industrial pumps: The industrial pumps unit's principal products include ready-made pumps based on standard specifications, customized pumps and integrated pump systems. As the Company has developed, it has made a structural shift to higher margin products and services in the pump sector, particularly on bespoke, integrated pump systems built on a turn-key basis for large infrastructure projects.

The industrial pumps business unit also provides aftermarket services, maintenance, repair and other support for its products;

OIL AND GAS EQUIPMENT

	ACTIVITIES	CORE PRODUCTS AND SERVICES
	Manufactures and installs ready-made units for oil and gas industry	<ul style="list-style-type: none">▪ Oil pumping stations and pump stations for water injection▪ Oil & gas and water processing units▪ Nuclear and Thermal power,▪ Tanks, reservoirs and vessels▪ Oil development equipment
REVENUE	EBITDA MARGIN	EMPLOYEES
7,828	17.8%	2,510

Oil and gas equipment: The segment's products are equipment packages installed inside a self-contained, free-standing structure that could be delivered to and installed on the customer's site as a modular and completely integrated part of the customer's operations. The segment also provides aftermarket services, maintenance, repair works and other support for its products;

COMPRESSORS

	ACTIVITIES	CORE PRODUCTS AND SERVICES
	Design, manufacture, install and service compressors	<ul style="list-style-type: none">▪ Oil and gas production▪ Oil and gas transportation▪ Refrigeration applied across different industries
REVENUE	EBITDA MARGIN	EMPLOYEES
1,426	6.0%	2,400

Compressors: The segment was established after acquisition of a leading Russian compressor producer KazanKompressormash in July 2012. The compressors unit's principal products include ready-made customized and special project-tailored compressors and compressor based solutions including compressor units and compressor stations.

The compressors business segment also provides aftermarket services, maintenance, repair and other support for its products;

ENGINEERING, PROCUREMENT AND CONSTRUCTION (EPC)

	ACTIVITIES	CORE PRODUCTS AND SERVICES
	Design, project planning and management, procurement and implementation	<ul style="list-style-type: none">▪ Oil and gas projects focused on design and planning▪ Oilfield infrastructure and pipelines construction▪ Supplying of equipment
REVENUE	EBITDA MARGIN	EMPLOYEES
7,336	6.5%	3,541

EPC: The segment designs, engineers, manages and provides construction works, including on a turn-key basis, for customers in the upstream oil and gas, oil transportation and water utility sectors.
